Thanks, Adam! Look forward to catching up. I'll give you a call later today – would love to hear about your trip.

Thanks,

Peter

Here's a few lines you may want to include:

Warm Springs – Council briefing last Monday was met warmly with some pinpointed questions from Council to Baron and tribal senior staff on continued budget concerns and adequacy of operator training. Baron explained current status compliance with Orders, and areas where Tribe will potentially be in violation because staff were appropriately focused on getting distribution system back on line. Utilities hope to lift BWN by end of July. Baron also met individually with water plant operators to review requirements under both Orders and to underscore that their actions will be under scrutiny for some time and so documentation is key. Utility directors is requiring operators to sign the coagulation order required under the order to confirm they understand and will implement.

Grand Rhone tribe and optimization training at Spirit Mountain Casino – (probably just for you Peter) this type of optimization evaluation uncovered some series operational verification issues at the system and with the R10 DW program in terms of lack of having some policies in place on surface water systems similar to the states. These optimization evaluations should be part of the story when thinking about filed presence under the coming NCI.
